Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2, 5 and 9 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Takashi (JP 58-122822).

Takashi discloses a method for attaching a cap to a pipe. As shown in the figures, pipe 2, with synthetic resin layer 1, is positioned in jig 5. Cap 3 is positioned over the end of pipe 2. Ultrasonic horn 7 presses the cap 3 into the pipe 2 and welds the cap to the pipe in the manner claimed by the applicant.

### *Claim Rejections - 35 USC § 103*

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 3-4, 6-8 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Takashi as described above in paragraph 2.

Regarding claims 3, 6-7 and 10 it is the examiner's position that the specific materials used (i.e. internal antistatic layer, electrically conductive layer) are well known

Art Unit: 1734

and conventional in the art and would have been obvious to employ in the method of Takashi based on desired physical properties of the articles being manufactured.

Regarding claims 4 and 8, it is the examiner's position that the specific types of pipe (i.e. fuel line, coolant line, brake fluid line, windshield washer system line) are within the purview of one having ordinary skill in the art. Therefore it would have been obvious to one having ordinary skill in the art to employ such types of pipe in the method of Takashi based on desired used of the materials.
